RE: Pressure Ratings of Nipples

To Whom It May Concern:

Beck Manufacturing's nipples are manufactured in accordance with the latest ASTM Specification A733 for Schedule 40 and 80 pipe nipples.

The Schedule 40 nipples are normally used for applications up to 150 P.S.I. The Schedule 80 nipples are normally used for application up to 300 P.S.I.

Please note that factors such as shock, extreme temperature variations and assembly procedures can all play a role in determining the suitability of the nipples for a specific application.

Sincerely,

Dale E. Thompson
Quality Manager
