

## SCOTHCOTE 134

## CORVEL 1660

### PROTECT YOUR PRODUCTS AND YOUR INVESTMENT WITH *ANVIL COATINGS*.

Did you know that Anvil can provide you with **significant cost-savings** for your underground piping applications?

#### *Did you know..*

Anvil International is the only manufacturer to stock, offer and warranty coated piping product solutions.

Anvil's protective coatings are ideal for both internal and external applications, including:

- Natural Gas
- Petroleum
- Water and Sewage
- Refineries
- Petrochemical Plants
- Power Plants
- Paper Mills

Your drilling or recovery efforts stir up, push down and release corrosive chemicals that attack your piping products, destroying their performance— and your investment.

Anvil's field-proven, cost-effective coatings are designed to protect all grades of Malleable, Cast Iron, Forged Steel and Ductile piping products against a wide range of environmental concerns, including soil stress, soil acids, bacteria and fungus, and alkalis. Our coatings include:

- **Scotchcote 134** — A fusion bonded epoxy coating designed to resist wastewater, corrosive soils, hydrocarbons, harsh chemicals, brine and saltwater.
- **Corvel 1660** — Specially designed to protect the inside diameter of tubular goods from corrosive conditions such as H<sub>2</sub>S, CO<sub>2</sub>, harsh chemicals, brine and saltwater.
- **Additional Coatings** — We offer other coatings as well, including: *Nickel, Chrome, Teflon, Nap-Guard, Powder* and many more.

Let us help you prolong your piping product investment and save you money.
