

SuperFlex® with patented SLT Technology

The only fully welded flexible sprinkler drop in the industry is available with patented SLT Technology and SlideLOK® 74FP couplings.

Description

No need to measure or count the number of bends, no leaks or kinks, no worries!

This sprinkler drop provides all the flexibility needed for an error-free installation.

Comes assembled, can be used with standard 1" welded outlets and fittings, and reduces labor costs.

Features & Benefits

- Fast and easy installation
- UL Listed for 2" bend radius, up to 12 bends per hose*
- Eliminates taping or doping of threaded fittings
- Flexible design provides versatility for changes in plan
- Perfect center-of-tile and aesthetic uniformity

*12 bends are only applicable for the 6 foot hose.

Please contact your local ASC Engineered Solutions sales representative for more information about Superflex Sprinkler Drops with SLT Technology.
